

Full-featured fixed asset management module specifically designed to assist companies of all sizes to account for and manage their fixed assets records. Unlike other fixed asset modules which are difficult to learn and use with poorly designed reports, it provides end-users with an intuitive interface, ease of use and minimum learning process. Designed to cater to a wide range of businesses, the module provides complete management control over fixed assets and eliminates the time and effort normally associated with this task.

Features:

- Fully integrated with the BeGL - General Ledger Accounting Module.
- Multi company groups, multi companies under each group with multiple users. Includes a very powerful authorization scheme.
- Multi-user, English interface with English / Arabic menus, and Arabic fly-over help & uses the latest technological methods for user interfaces.
- Powerful search techniques using user-defined filters.
- Multiple currencies with currencies daily rates history.
- Maintaining fixed assets records, suppliers records, manufacturers records, and maintenance companies records.
- User-define assets locations, status, disposal reasons, and acquisition methods.
