Spreadsheet-based commission calculation software suffers from numerous errors, and payment delays, causing your sales force to lose faith in the system and waste their time trying to sort out their own compensations. BeCO Commission Management Module stops this problem by providing real-time visibility into earned compensation, letting your sales force focus on selling, and leave their compensation to the experts. BeCO is a simple, and flexible sales commission software module that is easy to use and cost-effective to implement, and offers the key features, benefits and functionality that you are looking for. It calculates salespeople's commissions accurately, quickly, and professionally. It works integrated into the BeGL (General Ledger Accounting) Module, BeRP (Receivables & Payables) Module, and the BeSA (Sales) Module allowing data interchange between them, it takes sales data, clients' settlement data, and applies commission calculation policies you have set, to produce commission statements.

Features:

- Multi companies under each group with multiple users. Includes a very powerful authorization scheme.
- Multi-user, English interface with English / Arabic menus, and Arabic fly-over help & uses the latest technological methods for user interfaces.
- Powerful search techniques using user-defined filters.
- Allowing multi-commission policies definition, for items and items groups, using fixed percentages, percentages by discount ranges, or percentages by invoice settlement period, or can combine between them.
- Allocating one or multi-commission policies by each salesman.
- Detailed or summary by item, category, or invoice salesmen commission calculation reports.
- Trial or final salesmen due commission reports.
- Invoices settlement control reports by salesmen.
