

It is a simple-to-use, powerful software module for doctors, outpatient medical clinics, and medical centers. It enables doctors to diagnose cases using the ICD10 codes, view patients' biography and medical records archive, create comprehensive case notes, electronically prescribe medications, order investigations, X-rays, laboratory tests, physiotherapy treatments, schedule appointments, and print sick leave, medical report, referral report, medical certificate, and infectious disease notification.

It provides doctors with important data with the click of a button to track their patient progress and manage their treatment plan and also helps them to see past visit details, diagnoses, case notes, vital signs, prescribed medications, imaging and lab results.

It is a user-friendly solution for doctors, packed with innovative features, and takes minimal time to master.

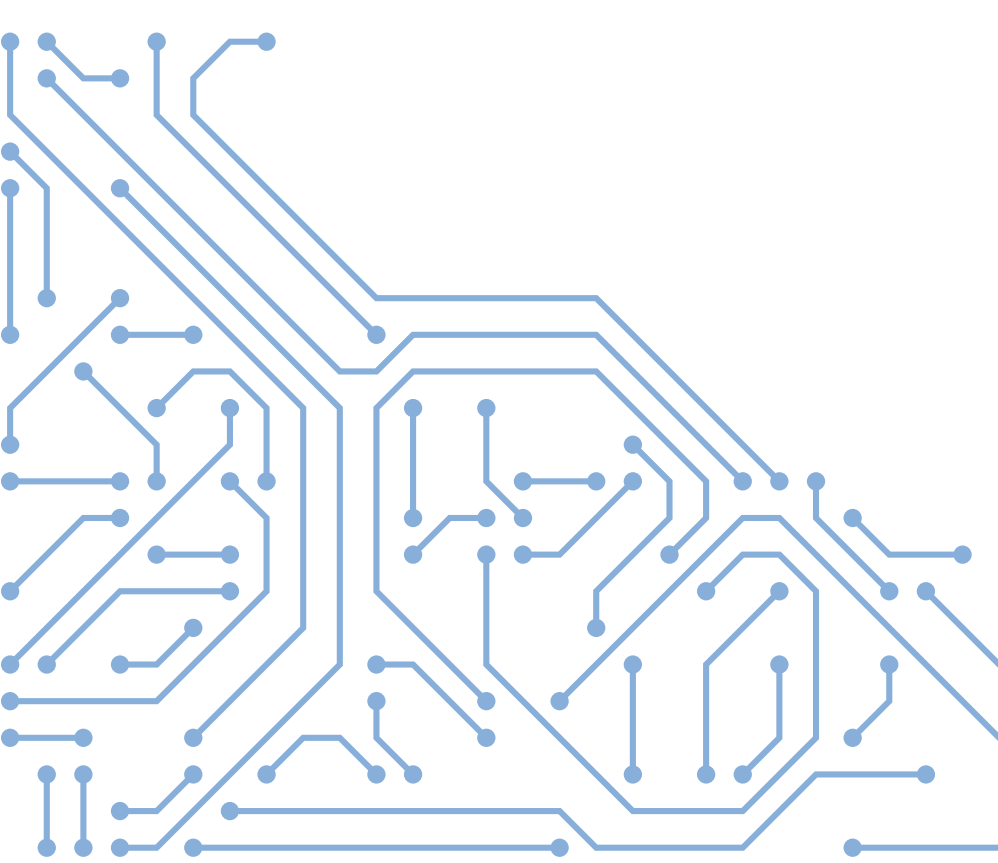

It is a revolutionary and comprehensive software module designed to make life simpler and easier for doctors and medical centers, and reduces paperwork by creating intelligent digital patient case sheets.

It can be used by multiple physicians and clinics, allows doctors to capture more accurate information right at the point of care, accessing information in real-time and eliminating tedious manual processes, thereby giving them the gift of time, which can be devoted to needy patients.

It has to be used in conjunction with the BeMC (Out-Patient Medical Center Management + Small InOut Balance Inventory) module, and the BeMA (Medical Records Archive) module.

Features:

- Multiple users, includes very powerful authorization scheme.
- Multi user, English interface with English / Arabic menus, and Arabic fly-over help & uses the latest technological methods for user interfaces.
- Powerful search techniques using user defined filters.

*Runs under Windows®.
Works on LAN, RDP,
CITRIX®.
Could be hosted on
premises or on cloud.*
