

Repairs & maintenance are major costs for Fleet Managers but failing to maintain your fleet may void your warranty, increase repair costs and reduce resale values, not to mention the health and safety concerns.

Manage it correctly using BeMW; whether you have an internal workshop, use external suppliers, or both, BeMW will tell you which vehicles are due for service and when, allocate parts and requirements and record timesheets, additional requirements/parts & downtime.

BeMW accrues all costs for invoicing and saves a complete maintenance history for every item, even when disposed, via the original job card.

Features:

- Multi companies under each group with multiple users. Includes a very powerful authorization scheme.
- Multi-user, English interface with English / Arabic menus, and Arabic fly-over help & uses the latest technological methods for user interfaces.
